

# UNIQUE FORMULATION

# EXQUISITE ONE-OF-A-KIND WALLS

Ecological Design Plaster - Natural Resources in an Innovate Symbiosis

NATURAFIX plasters provide your rooms with fascinating perspectives.

With this all-new natural building material, the most extravagant one-of-a-kind walls can be created.

Its innovative formulation combines high-value, milled minerals, such as marble, rose quartz, granite etc., with exquisite, purely vegetable substances. Since the hue of the plaster comes from the milled natural stone, no chemical pigments are required for the colouring.

Mica minerals from pure mountain crystals may be added to the mix and provide the wall with artful, lustrous light effects when a light source is present.

Particularly popular in the hotel and commercial sector and also gastronomy, is our NATURAFIX AROMA LINE.

Coffee, tea, hay, straw, lavender and natural wood coatings, stylishly presented, disseminate a first-class cosy natural feeling.

## EYE-CATCHER

100% Natural

PREMIUM QUALITY · MADE IN GERMANY

NATURAL DESIGN

Unique natural stone plaster with the aura of thousands-of-years-old high-value minerals.

TOP-MOST SORPTION CAPACITY - 100% NATURAL

# Lifestyle NATURE LINE

## EXQUISITE LINE

Natural Wall Coatings with the Aura

of Thousands-of-Years-Old Minerals.

Matching architecture and purist interior design concepts, NATURAFIX offers the ideal natural design plaster. Platinum, gold and manganese coloured minerals magically turn any wall into a natural object. The natural colourings harmonise excellently as a contrast to modern designer furniture. Their effect is calming and relaxing.

Honey-coloured, warm NATURAFIX plasters bring the flair of Tuscany to your rooms. You thus create a pleasant living atmosphere. Positive energies are spurred on.

NATURAL DESIGN is not just a popular trend, but also health provision par excellence. After all, one in three Germans are currently suffering from allergies. It is thus essential, to eliminate harmful construction chemistry from living and work areas right from the start.

The German manufacturer NATURAFIX has developed a NATURAL DESIGN PLASTER which outshines any previous products. It is unique in the market and cannot be compared with traditional loam rendering and lime plaster.

High-value, precious, milled minerals are in symbiosis with purely vegetable, exquisite substances. The innovative formulation manages completely without chemical additives. It doesn't contain any softening agents, solvents and toxic pigments. Also, NATURAFIX plaster's physical properties for construction applications are outstanding. Therefore, this natural plaster really has the top-most sorption capacity - an important factor for a first-class, healthy indoor climate.

The natural aesthetics of the minerals lend rooms an exceptional charisma and a character of their own.

## AROMA LINE

For special »room themes«, the NATURAFIX product range offers impressive coffee, tea, hay, straw, lavender or natural wood coatings.

Diverse surface design options allow you to individualise your walls and lend them unique expressiveness.

Sensual room experience · Unadorned · Environmentally aware · Sustainable
